

ABOUT US

LIS (Laboratory of Social Inspiration) is a foundation which was established because of passionate people who have been supporting development of local communities for many years now. Our primary goal is to build the civil society, mainly in small towns and villages and develop initiatives which bring about social changes. Laboratory of Social Inspirations also works with diversified social groups, both with the local community and local businesses as well as the authorities. Our activities are driven by the following mission: having local development in mind we wish to inspire others to cooperate and strengthen the social potential of the institution.

The acronym of our name LIS is the Polish word for a fox. Hence, this animal has been with us since the beginnings. Our foundation is a progressive organisation made up of committed team members who are passionate about the work they do.

OUR ACTIVITIES:

In our activities we are driven by such values as partnership and cooperation with local institutions and leaders. We provide a high quality of our activity since our work is our passion. Therefore, when putting ideas into action we bear in mind professional planning and a proper response to the real needs. Below are several of our flagship projects:

Local Leader Academy (ALL) - it is a project directed at 80 leaders of local communities. In this project we provide training, consulting and networking so that local representatives can be best prepared for work for the community. The crowning moment of the cooperation with leaders is Forum of Local Leaders and a contest for the most successful grassroots initiatives.

Multinational LIS! – it is a project which helps us develop as an organisation and a team. Within Multinational LIS we prepare for establishing relations with both our current and future foreign partners.

Erasmus + - this project aims at preparation and implementation of innovative/advanced training of trainers for our 10 experts who specialise in work with local communities and disadvantaged groups. The project is carried out with cooperation with partners from Finland, Portugal and Ireland.

APAW (APAP) – our project in a consortium with the leader named *Grupa Doradcza Projekt*. APAW stands for Adaptation, Plan, Activity and Work for the youth, i. e. 300 individuals aged 15-29. The main aim of the project is to acquire qualifications and professional competence as well as experience through an innovative program of training and dedicated consulting.

OUR OFFER:

Our offer covers three areas where we deliver training, consulting and coaching.

STRATEGIES - we specialize in strategic development of social and municipal organisations as well as businesses in terms of planning and implementing strategies, operational plans, day-to-day management and implementation of projects. Our offer includes comprehensive support, always tailored to suit the needs and possibilities of a given organization. We are still on a lookout for new solutions while applying participatory methods of work and we care for a drive for best results.

PROMOTION - we support NGOs, municipal administration and local communities in creating communication strategies. We demonstrate efficient communication with the recipients in the light of the following: draw a picture with words so that your recipient will find delight in it. We educate and advise how to make use of social media and not get lost in the jungle of new technologies. We help to create amazing campaigns within crowdfunding activity.

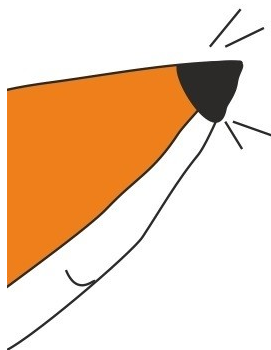

DEVELOPMENT- it is fundamental for our activity. Our team is a group of individuals addicted to constant development and hence our work is also our passion! Our offer includes among others: outdoor training or a blog dedicated to sharing tasty stories.
